

## Maple5 Launches Acceleratio Ltd's Citrix & Terminal Services Monitoring Solutions in the UK

**Reading, UK – July 26th 2011** – Maple5 Limited announce the launch of Acceleratio Ltd's range of monitoring and alerting solutions for Citrix, Terminal Services, Remote Desktop Gateways and VDI platforms.

"The beauty of the Acceleratio product portfolio is that it is not a massively complex framework. The products just deliver information that is not currently available in one place, in a simple and easy to implement solution," says Daniel Power, Sales Director at Maple5.

"The current focus on VDI and Server Based Computing (SBC) has seen increased requirements for in depth analysis and reporting of who is accessing SBC resources, what resources are being accessed, and how those resources are functioning." says Frane Borozan, CEO of Acceleratio Ltd. "License management is also becoming an important part of managing a Cotrix/Terminal Services environment."

The current portfolio comprises:

- **Terminal Services Log**
- **Virtual Desktop Monitor**
- **Remote Desktop Gateway Monitor**

Information from the solutions will show the amount of time users spent connected to Terminal Services / Citrix XenApp servers. This data can be used for time tracking, billing purposes, employee auditing or server farm resource optimization and compliance.

### Channel Recruitment

Maple5 are targeting two elements of the IT channel.

**MSPs:** The Acceleratio solutions are perfect for MSPs who are looking to bill their hosted desktop licenses on a per hour, per server or per user basis.

**VARs:** The acceleration solutions are a perfect add-on sale to any organization deploying Terminal Services, Citrix or VDI environments.

### **About Maple5**

Maple5 brings world class system, security and virtualization management tools to the UK and Europe. Delivering professional sales and technical support Maple5 is bringing together a range of exciting technologies that make the life of the IT professional more productive, and delivering real Return on Investment to IT organisations.

### **About Acceleratio Ltd**

Founded in 2008., Acceleratio Ltd. is a software development company based in Ronkonkoma, New York, US and Split, Croatia. Acceleratio specialize in developing high-quality enterprise applications and provide consulting for Microsoft Terminal Services and Citrix technology. Acceleratio products are used by organizations worldwide on thousands of servers. Our goal is to improve the performance and reliability of Terminal Services and Citrix farms while decreasing the total cost of ownership through innovative software.
